Precipitation probability							
80%	60%	60%	40%	40%	30%	10%	00%

Forecast for Wednesday 07 Jul 2021

Weather: Persistent rain first thing will slowly ease through the morning before cloud breaks up allowing sunny spells to develop before lunch. There will be a risk of heavy showers and a low risk of thunderstorms in the afternoon, though by the evening conditions will become dry with long lived sunny spells with some patches of mist and fog forming in valleys.

Chance of cloud free mountain/hill tops above 600m: Less than 10% at first, improving to become 70% by mid-morning and 100% by the evening.

Visibility: Poor first thing, very poor in west facing slopes, with widespread cloud with bases of around 500m, cloud will break up and bases will lift to around 700m, only covering the highest tops from time to time by mid-afternoon. Though, conditions will deteriorate suddenly in any heavy showers through the afternoon. Into the evening visibility will become very good on hill tops but poor in patches of mist and fog in valleys.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

The poorest conditions will be through the morning, with more sunshine and drier spells in from mid-morning onwards making for very high UV levels. However, heavy showers will temporarily deteriorate conditions rapidly so a waterproof is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 06 Jul 2021	19.4mm	27.6mm	30.2mm

Forecast for Thursday 08 Jul 2021

Weather: An improved day, though there will by some low cloud and mist around first thing much of the day will see with sunny spells and the odd shower in the afternoon. UV levels will be very high and it will feel warm in the sunshine.

Maximum wind: westerly mean 10mph gusts of up to 20mph.

Chance of cloud free mountain/hill tops above 600m: 80% first thing becoming 100% later.

Visibility: Very good in general throughout the day with cloud occasionally covering the highest hill tops, though poor in patchy cloud around 300m in western regions first thing and in any showers through the afternoon.

Temperature: **Valleys:** Plus 12 Celsius becoming plus 19 Celsius.
At 600m: Plus 13 Celsius.
Freezing level: Above the summits.
